

**GCPS Progress Report**  
**October, 2020**  
**By Diane Sterne**

- A HUGE thank you again, to Howard Peet for his generous donation to the GCPS! We continue to be awed by your generosity. Thank you so very, very much!!!
- We dropped off another 100 tourist maps at the town site. That brings us to a total of 1,000 for this year alone!! It seems that every time we drive by there, someone is walking around the town. It is great to see!!!
- Roy Roberts found an old 1930 license plate on one of his claims recently. He had been metal detecting when he found it. Since it is the same era as the Delprato Cabin, he is kindly donating it to the GCPS to display there. When we get it, we will try to find a spot inside the cabin that can hopefully be seen through a window and display it on a wall. I fear if we put it on an outside wall, someone might pinch it. Thank you so very much Roy for offering this to us. We really appreciate it! Our little, living museum in the bush is certainly getting some really great items!!!
- The game plan was that Bob and I would be going to the cabin before our AGM and do some work there. Linda Allison has been up there working with her herd and putting up some more fencing, so we will need to wait until she is done. We don't want to get in her way while she is bringing the cattle back down from the mountain. Hopefully we will get the work done at a later date before the snow flies. ☺ We did manage to pop into the cabin just to check on it last week and there were no mice in the bucket trap. I didn't go into the cellar as we were just on our way through for a grouse hunting expedition so we couldn't spend any time there. We didn't smell pack rats but next time we go in to winterize, my plan is to go down and do rat control if needed. I also picked up some spray foam to take in, as the last time I saw a hole in the cellar wall that the rats were using to get into the cellar.
- We need to discuss what we want to do regarding the Cemetery. Do we want to pursue getting it reopened?
